

## COMPANY BUSINESS

Recycle used tyres into a syngas which can then be further processed into polyethylene. .

## COMPANY MISSION

Our mission is to mitigate against the release of highly toxic greenhouse emissions, caused by accidental or on purpose wild tyre fires, which destroy public & private infrastructure.

Safety will be the first consideration in all operations. Corporate activities will be conducted professionally.

We intend to meet challenging objectives connecting & utilizing the skillsets of capable professionals who believe in innovative processes that can add value to our company and our partners & suppliers bottom line.

## COMPANY VALUES

As a labour intensive operation the company's corporate culture starts with staff being adequately trained, as this will motivate employees to be productive. Productive employees will afford us to realise quick turnaround times which can offer us with an opportunity to release client satisfaction & loyalty, and as a result strengthening the company's balance sheet.

## COMPANY PHILOSOPHY

One of the adversaries we are fighting against is synergism, the notion that we cannot do anything about climate change. As no nation large or small, wealthy or deprived is immune to what this means. We are the first generation to feel the impact of climate change and the last that can do something about it. We can show the world what is possible when we come together, united in common effort and by common purpose, but only if we rise to this CHALLENGE.
